

AccuFund's new partnership with payment processor BluePay allows AccuFund clients to capture internal processing and external donations securely through BluePay. In conjunction with Salesforce and AccuFund's constituent relationship management (CRM) solution, AccuFund CRM, BluePay enhances the functionality of a nonprofit's CRM by providing a virtual terminal for internal processing. In addition, it also provides online processing for one-time or recurring donation collecting, without sending donors or users to a third-party site to submit payments.
