

## Special Offer on Employee Portal, Time Keeping and Payroll Solutions

**Dashboards** provide instant, graphical information to the management team each day, reinforcing agency objectives and focus. You can design dashboard content for each user so they see exactly what is important to them.

**Employee Portal** is the means to enhance communication between you and your employees. It allows you to publish news and information to the portal where employees can instantly get access to the information you posted. In addition, Portal gives the employee a means to up-date any of their demographical information that you enable.

**Employee Self-Service** (requires Employee Portal and Payroll or Human Resources) extends your ability to communicate with your employees. Whether it is Open Enrollment period or new benefits that are offered, Self-Service enables the employee to go to the web, review the information, make their choices and you have the ability to approve their final selections.

**AccuFund Time Clocks** (Requires Time Clock Interface). Now AccuFund offers both proximity and biometric time clocks that are placed on your network and polled to import employee time via the AccuFund Time Clock Interface module.

**Payroll Module** For clients that are not using the AccuFund Payroll solution and wish to minimize the cost of their payroll provider services while enhancing the ability to distribute labor to the departments, grants, contracts and programs in your entity.

**Human Resources** Extensive design and reporting capabilities to manage the HR function within your organization. In addition, coupled with Employee Portal, you have the ability to easily manage the open enrollment activities as well as reduce the dependence on paper within your organization.

**Complete the order form below for the modules and time keeping devices you require and we will send you a confirmation.**
