ACCUFUND®

Powered by VERTICALS

AccuFund has released version 4.04 of the AccuFund Accounting Suite. Version 4.04 has several major highlights. It includes a report scheduler that moves the production of reports off the user's desktop to be run, as well as the ability to schedule for off hours and on a recurring basis. Other enhancements include extension of the Employee Portal Time Entry module to include calendar entry of time, integration of time-clock entered time into Time Entry for review and approval, and in Payroll the ability to automatically accrue payroll expenses across months in a single pay period. click here to read the full review.
