

AccuFund announces the new Position Control Module, an add-on to the Payroll Module in the AccuFund Accounting Suite. With this new module, organizations can track employees by position and know which positions are open or have been filled. When an employee enters their time, that information is automatically recorded to their position, enabling the organization to know how much has been expensed to that position. The new Position Control Module helps organizations get a better handle on their employee commitments to grants and obtain specific information on the positions it has.
