

AccuFund, Inc. celebrates 20 years of providing nonprofit and government financial/ERP management software.

From its roots developing apps for existing accounting software to launching true browser-based fund accounting solutions, AccuFund has evolved into the go-to source for nonprofits, municipalities and governments serious about managing their finances effectively.

### **AccuFund's Early History**

AccuFund began as an offshoot of the consulting business of founders Gordon Holfelder and Peter Stam. Holfelder began by creating a unique solution to custom-print checks for NASCAR race winners. He used the initial profits from this venture to move into software development, a bank reconciliation module for nonprofits.

"Most software companies start with their core package and develop add-ons," said Gordon Holfelder, one of the company's founders. "We began with the add-ons, then realized we could compile them together to create a core package."

### **AccuFund Government and Nonprofit Financial Management System**

AccuFund's comprehensive government and nonprofit accounting software offers robust reporting capabilities, dashboards for more informed decisions, and excellent customer service. The core system includes a general ledger, the ability to track and pay bills, manage cash receipts, and reconcile bank accounts, plus specialized government-related modules such as utility billing, fees, taxes and licenses, and more.

AccuFund continues to be a technology leader in the industry, offering onsite and online system deployment options, with the unique flexibility of moving from one to the other when needs change.

Value-Added Resellers have been an integral part of AccuFund's success. Resellers have, since the company's early days, offered consultation, customization and implementation

specialty services.
