AccuFund's Smart Capture module uses optical character recognition (OCR) powered by artificial intelligence to automate bill pay functions.

AccuFund announced the release of its new Smart Capture module to automate bill pay functions. Powered by AI technology, AccuFund Smart Capture automates the creation of AP Bills from scanned PDF documents. Smart Capture learns the way nonprofits and local governments do business, saving time and money.

Smart Capture is the first new module built specifically for AccuFund Anywhere. AccuFund Anywhere is browser-native accounting software that serves nonprofit organizations and local governments of all sizes. Its convenience, usability, and security are the new standard for today's environment and helps users adapt to a changing world.
