

Budget Managers now have improved control of the budget process with the AccuFund Accounting Suite Budget Development module. The module allows each organization to budget at the organizational level appropriate for them and with separation of functions as appropriate. Budget Development uses budget cycles to track the process of budget approvals. This function can be especially important for government agencies with a formal budgeting process. Each departmental user has access to the history for their area to assist with future budgets. The module is available now, and through July 15, 2007 has reduced pricing for existing clients.
